

Preuzmi broj commitova vuejs repozitorija i prikaži rezultat

Zadatak vam je napraviti malu Vue.js aplikaciju koja će prikazivati commitove vuejs repozitorija.

1. Aplikacija se treba sastojati od dva pagea,
2. Prvi page mora prikazivati barem 10 **SHA** commitova u obliku liste,
3. Drugi page prikazuje detalje tog commita - ime i email autora, poruku commita te datum kada je commitano,
4. Pritisak na SHA link vas vodi do detalja tog specifičnog commita
5. Treba postojati back button u drugom pageu koji vodi nazad na prvi i
6. Neka bude lijepo.

Moj prijedlog, s time da prve dvije linije nisu prijedlog :)

1. Pošalji **GET** request na: <https://api.github.com/repos/vuejs/vue/commits>,
2. **Response** od tog **GET** requesta stavi u data() jednog viewa,
3. View neka čini podloga, primjerice prazan v-card kao što ima Vuetify,
4. Unutar tog v-carda neka bude jedan v-for za iteraciju nad podacima Responsea - SHA linkovima,
5. Detalji, iliti page 2, nek budu komponenta kojoj će se detalji commita proslijediti kao propsi i
6. To je više-manje to, stavi button s linkom za nazad.

Detalji ne moraju biti komponenta, samo prijedlog.

Tip: možete koristiti Vuetify i instalirajte si Postman: <https://www.postman.com/>.

Primjer jednog objekta u responseu.
